HIGH INTENSITY, LESS ENERGY!

HIGH INTENSITY DISCHARGE (HID) lamps produce high levels of light over large areas, and are therefore used in outdoor applications such as parking lots and stadiums, and indoor applications like warehouses and gyms. But traditional HID lamps tend to age poorly, with lumen outputs deteriorating rapidly after the 10,000 hour mark.

Enter LED HID Replacement Lamps, which provide lumen levels to rival legacy metal halide, high pressure sodium, or mercury vapor lamps, at a mere fraction of the energy cost – and maintain their lumens through a significantly longer lamp life.

APPLICATIONS

DESIGNLIGHTS CONSORTIUM® 5.0

Many of EIKO's LED HID products are DesignLights Consortium® 5.0 Qualified for high performance and energy efficiency. Products that earn the DLC qualification are often eligible for rebates through various energy efficiency programs.

DESIGNLIGHTS CONSORTIUM® 5.1

EiKO also carries LED HID products that qualify for DesignLights Consortium® 5.1, which includes additional controls requirements to maximize energy savings. EiKO's LED HID Area Lights, High Bays, and Universal lamps are available with plug-and-play sensors to meet these requirements.

LED HID PRODUCT LINES

POST-TOP

- In small, medium, and large sizes, and wattages from 24W-120W
- Lasts 3x as long as HID and consumes up to 80% less energy
- Universal mounting position
- Built-in surge protection
- Medium and Mogul base options

AREA LIGHT

- Unique design with 180° light for area lights, shoeboxes, and more
- Lamp body folds out to provide directional lighting
- Plug-and-play external photocell or motion sensor available; qualifies for DLC 5.1

HIGH BAY

- Replaces high watt 250W and 400W HID fixtures
- Suitable for enclosed fixtures
- Universal mounting position
- Plug-and-play external photocell or motion sensor available; qualifies for DLC 5.1

HORIZONTAL

- 360° beam angle; lamp body folds out to provide directional 180° beam
- Designed for horizontal applications; can be used as an omnidirectional option
- Lasts 3x longer than metal halide or high pressure sodium lamps

UNIVERSAL

- Universal mounting position with adjustable light arrays
- Functions as a post-top, shoebox light, high bay, or area light
- Plug-and-play external photocell or motion sensor available; qualifies for DLC 5.1

FIELD CCT SELECTABLE

- FieldCCT feature allows for multiple "set and forget" CCT options in each fixture
- Plug-and-play external photocell or motion sensor available; qualifies for DLC 5.1
- Universal mounting position

A-SHAPE

- Compact design allows for use in tight applications such as bollards
- In dimming or universal 120-277V options for HID retrofit applications
- Can be used in base up or base down position
- Excellent thermal management

TEMPORARY WORK LIGHT

- Delivers superior performance over legacy HID fixtures at 120 lpw
- Includes 6' power cord
- Linkable, allowing for multiple lamps to be powered from one socket
- Provides easy operation and high lumen output with cage for protection

HIGH WATT A-LAMP

- Direct replacement for 125/150/200W incandescent A-lamps and up to 70W HID lamps
- Shatter-resistant plastic housing for reduced risk of injury and breakage
- Operates on universal 120-277V line voltage

ADVANTAGE

- Universal mounting position
- Lasts 3x longer than metal halide or HPS HID lamps
- Eliminates maintenance costs for over 10 years; no expensive HID lamps or ballasts to replace
- Shatter resistant
